

How we work

The first appointment lasts for about one hour, in which time you will have the option to select from over 100 models of wedding dresses for brides – which includes a complete collection of day, cocktail and evening wear suitable for women of all ages. You are welcome to try on as many dresses as you like.

Even though our dresses are hand-crafted by our team, our prices are accessible and we have things for most budgets.

Once you select or adapt a model, we take your measurements and reserve the fabric for your garment. Generally, two or three fittings will be sufficient to make your dress. Regardless of the number of the fittings, all customers will have dedicated personal attention to ensure that the dress fits you perfectly.

First Fitting: 6 to 8 weeks before the event. The unfinished dress will be moulded to your body with the pattern and pins.

Second Fitting: 1 to 2 weeks after the first fitting. This is the fitting where the neckline is decided and length is finalised with the shoes you will be wearing.

Third Fitting and your dress is ready to take with you: 2 to 3 weeks before the event the dress will be ready, but may need a final minor adjustment which we will do the same day.

* It is imperative that you bring to all fittings, the bra and shoes that you will be wearing with your dress. You can find amazing body shaping accessories made by Spanx, please make sure that you wear these to all three fittings. www.spanx.com

* Please keep your day flexible on the final fitting day – or plan to have lunch after your appointment, just in case you need to return a bit later on in the day after final tweaking.
